What is TCAS?

The Thai University Central Admission System (TCAS) is a national entrance examination system for over 75 universities across Thailand. It is used to select students for bachelor's degree programs, based on the content from the IPST 2017 curriculum.

Who can take the TCAS exam?

Eligible participants include Mathayom 6 students expecting to graduate in the current year, as well as graduates from Mathayom 6 or equivalent (including those studying at the university level without needing to resign). Other eligible candidates include students with equivalent qualifications such as those who have passed at least two subjects in the GED exam, current Grade 12 students studying abroad who have passed the GED exam, or individuals holding a vocational certificate.

TCAS Rounds

Round 1: Portfolio

This round evaluates students based on their portfolios, GPA (grade point average), or other relevant qualifications. Each university may have its own specific portfolio requirements, such as types and number of works or essays. Some institutions may also consider central exam scores.

Round 2: Quota

The quota round focuses on recruiting students with specific qualifications, such as those from particular regions, schools, or with special abilities. This round may use central exam scores from TGAT/TPAT, A-Level, or other university-specific exams. Universities set their own selection criteria to find students who best meet their needs.

Round 3: Admission

In this important round, universities across Thailand open applications simultaneously through the TCAS system via the myTCAS website in May. The number of available spots may vary depending on the outcomes of the first two rounds. Universities set their own admission criteria and weigh central exam scores (TGAT/TPAT and A-Level) according to their preferences.

Round 4: Direct Admission

This round occurs after the results of Round 3 are announced. Universities open this round on their own and set their own selection criteria, which may be similar or different from previous rounds. It focuses on accepting students who did not succeed in earlier rounds or those who forfeited their previous admission offers to try again.

Kasetsart University Faculty Faculty of Engineering - B.Eng. Major: Software and Knowledge Engineering (International), Bang Khen Campus

This program offers an international curriculum in software engineering at the Bang Khen campus. Below are the details of the admission rounds and the number of spots available in each:

Round 1: Portfolio

Accepting 40 applicants.

International and English curriculums: 30 applicants.

Academic Olympiad: 10 applicants.

Eligibility: Graduates from core curriculum schools, international program schools, vocational schools, Informal Education (NFE) schools, and those who have completed the GED program.

For more details, visit admission.ku.ac.th.

Round 2: Quota

Accepting 16 applicants in total.

International and English curriculums: 11 applicants.

Outstanding students from the Demonstration School of Kasetsart University: 2 applicants.

Cooperation project: 3 applicants.

Eligibility: Same as Round 1.

For more details, visit admission.ku.ac.th.

Round 3: Admission

Accepting 10 applicants.

No specific details are provided, but eligibility may be similar to previous rounds.

Round 4: Direct Admission

Not accepting applications for this round.
